INDEX TO VOLUME XXVII

Abramson, Harold A. The relation of the electrical charge of bacteria to their stability. Abstract 89
Accessory, An, factor for legume nodule bacteria. I. Sources and activity ... 561
Acidity, The specific influence of, on the mechanism of nitrogen fixation by azotobacter 325
Acidophilus milk at room and ice-box temperatures. Abstract 38
Acidoproteolytes, The, in gaseous associative fermentation in milk. Abstract 69
Actinomyces, A new thermophilic 625
Action, The, of certain bacteria on some simple tri-glycerides and natural fats, as shown by nile-blue sulphate 473
Active immunization against poliomyelitis on monkeys. Abstract 84
Adaptation, The, of bacteriophage to an artificially produced anti-staphylococcus bacteriophagic serum. Abstract 50
Agar, An, plate method for the detection and enumeration of lipolytic microorganisms. Abstract 69
Age, breed and species susceptibility in transmissible leukosis. Abstract .. 79
Allen, Melvin C. The decomposition of alginic acid by microörganisms. Abstract 59
Allison, Franklin E. and Hoover, Sam R. An accessory factor for legume nodule bacteria. I. Sources and activity 561
American Type Culture Collection 486
Anderson, J. A. An agar plate method for the detection and enumeration of lipolytic microörganisms. Abstract 69
Anderson, J. A. and McGrath, James T. Lipolytic activities of several bacteria causing bitter cream. Abstract 68
Antigenic structure of *Staphylococcus aureus* and its variants. Abstract 97
——, The, relation of diphtheria organisms of the Gravis and Mitis strains. Abstract 96
——, The, value of unprecipitated and of alum precipitated tetanus toxoid. Abstract 95
Antiseptic, The, value for tubercle bacilli of certain recently-advocated compounds 517
Apparatus, An, for the control of composition and rate of flow of gas mixtures through culture solutions. Abstract 62
Aref, H. and Cruess, W. V. An investigation of the thermal death point of *Saccharomyces ellipsoideus* 443
Aronson, Joseph D. and Henderson, Howard J. Tuberculosis of cold-blooded animals. Abstract 101
Artificial, The, production of a specific lytic agent which behaves like bacteriophage. Abstract 49
Attempts to demonstrate a specific toxin in *Salmonella aertrycke*. (Var. meleagridis). Abstract 86

Avery, Oswald T. and Goebel, Walther F. The chemo-immunological properties of the specific capsular polysaccharide of pneumococcus Type I. Abstract 89
Azochloramid, a new selective bactericidal chlorine compound. Abstract .. 36
Azotobacter, The specific influence of acidity on the mechanism of nitrogen fixation by 325

Bacilli, paratyphoid, Studies on dissociation of. The rôle of variants in the precipitation of calcium sulphite 121
Bacillus megatherium, The growth of, in relation to the oxidation-reduction potential and the oxygen contact of the medium 109
Bacteria, A group of non-lactose-fermenting, isolated from stools of healthy food handlers 357
——, Growth and activity of, during manufacturing processes in the Swiss cheese kettle. The bacteriology of Swiss cheese. I 539
——, Interchange of, between the fresh water and the sea 201
——, Resistance to ultraviolet radiation of a plant virus as contrasted with vegetative and spore stages of certain. Irradiation of plant viruses and of microörganisms with monochromatic light. II 241
——, The action of certain, on some simple tri-glycerides and natural fats, as shown by nile-blue sulphate 473
——, The differentiation of living from dead, by staining reactions 175
——, Types of lipolysis brought about by, as shown by nile-blue sulphate .. 487
Bacterial culture, The physiological youth of a, as evidenced by cell metabolism 303
—— invasions of the blood stream in urology. Abstract 87
—— motility 165
Bactericidal, The, properties of ultraviolet irradiated petrolatum 453
Bacteriological, A comparative, study of a group of non-lactose-fermenting bacteria isolated from stools of healthy food-handlers 357
—— studies of the red discoloration of salted hides. Abstract 61
Bacteriology, The, of chronic mastitis. Abstract 73
——, The, of Swiss cheese. I. Growth and activity of bacteria during manufacturing processes in the Swiss cheese kettle 539
Bacteriophage, A coccoid form of *C. diphtheriae* susceptible to. I 403
——, A, for *Cl. tetani* 163
Bacteriostatic, The, effect of indol and skatol. Abstract 28
Bacterium coli, The failure of, from human feces to grow at 46° in the Eijkman or the Bulir tests 191
Baldwin, I. L. and Reid, J. J. The affect of the oxidation-reduction character of the medium on initiation of yeast growth. Abstract 29
Barnes, L. A. and Clarke, Charlotte M. The pneumococcidal powers of sodium oleate and sodium ricinoleate. Abstract 107
—— and White, Benjamin. The fermentation of glycogen by pneumococci. Abstract 106
Baumann, C. A. and Ingraham, M. A. The synthesis of carotene by bacteria. Abstract 25
Beaudette, F. R. Cloacal infection as a means of immunization against infectious laryngotracheitis of fowls. Abstract 80

Bengtson, Ida A. The problem of favorable culture media for the isolation of *Bacterium granulosis*. Abstract..... 34
Bergey, D. H. and Etris, S. The antigenic value of unprecipitated and of alum precipitated tetanus toxoid. Abstract..... 95
Bernstein, Arthur and Morton, Harry E. A new thermophilic actinomyces. 625
Biological characters of the G and M variants of a hemolytic streptococcus. Abstract..... 99
"Black beets"—A problem involving stimulation of bacterial growth by iron. Abstract..... 60
Black, Neil and Sears, H. J. The bactericidal properties of ultra-violet irradiated petrolatum..... 453
Bliss, Eleanor A. and Long, Perrin H. Studies on minute hemolytic streptococci. I. The cultural characteristics of minute hemolytic streptococci. Abstract..... 105
Boak, R. A. and Carpenter, C. M. *Brucella melitensis* infection in cattle. Abstract..... 73
——, —— and Warren, S. L. Symptomatic herpetic manifestations following artificially induced fevers. Abstract..... 83
Bowers, Chester S. and Hucker, G. J. The composition of standard media for use in routine milk control work. Abstract..... 71
Boyd, William C. and Hooker, Sanford B. The influence of the molecular weight of antigen on the proportion of antibody to antigen in precipitates. Abstract..... 91
Boyer, A. J. and Frazier, W. C. A method of distinguishing living from dead cells of gram-positive bacteria by stained preparations. Abstract.. 31
Boyer, A. J., Frazier, W. C., Sanders, G. P. and Long, H. F. The bacteriology of Swiss cheese. I. Growth and activity of bacteria during manufacturing processes in the Swiss cheese kettle..... 539
Brigham, G. D. and Plastridge, W. N. Observations on organisms associated with chronic bovine mastitis. Abstract..... 74
Broadhurst, Jean. Fungous phases in bacteria: zygotes and sporangia. Abstract..... 48
Brodie, Maurice. Active immunization against poliomyelitis on monkeys. Abstract..... 84
Broh-Kahn, Robert and Edwards, Philip R. A note on the hydrolysis of sodium hippurate by the hemolytic streptococci..... 535
Brown, J. Howard. Double-zone Beta hemolytic streptococci. Abstract.. 104
Brown, J. W. and Skinner, C. E. The failure of *Bacterium coli* from human feces to grow at 46° in the Eijkman or the Bulir tests..... 191
Brucella abortus infected udders, Studies on the leucocyte content of milk drawn from..... 293
—— *melitensis* infection in cattle. Abstract..... 73
Brunstetter, B. C. and Magoon, C. A. The rate at which spores of *B. mycoides Flügge*, suspended in peptone solution, become stainable. Abstract..... 27
Buddingh, G. J. and Goodpasture, E. W. Properties of vaccine cultivated in the chorio-allantoic membrane of chick embryos. Abstract..... 76
Bulir tests, The failure of *Bacterium coli* from human feces to grow at 46° in the Eijkman or the..... 191

Burk, Dean, Lineweaver, Hans and Horner, C. Kenneth. The specific influence of acidity on the mechanism of nitrogen fixation by azotobacter.. 325
Burke, Victor. Interchange of bacteria between the fresh water and the sea.. 201
Burkey, L. A. An improvement in the methylene blue reduction test. Abstract.... 67
Butyl alcohol, An unknown factor stimulating the formation of, by certain butyric acid bacteria.... 207
Butyric acid bacteria, An unknown factor stimulating the formation of butyl alcohol by certain.... 207

Calcium sulphite, The rôle of variants in the precipitation of. Studies on dissociation of certain paratyphoid bacilli.... 121
Caldwell, Dorothy W., Parker, Neil J. and Medlar, Edgar M. Studies on a herd infected with *Brucella abortus*. II. Incidence of milk infection in a vaccinated herd. Abstract.... 72
Caldwell, Mary E. Studies on dissociation of certain paratyphoid bacilli. The rôle of variants in the precipitation of calcium sulphite.... 121
Caldwell, Mary E., Jordan, Edwin O. and Reiter, Dorothy. Bacterial motility.... 165
Cameron, E. J. "Black beets"—a problem involving stimulation of bacterial growth by iron. Abstract.... 60
Cameron, George M. and Sherman, James M. Lethal environmental factors within the natural range of growth.... 341
—— and ——. Rate of growth and viability in *Bacterium coli*. Abstract.. 23
——, Ruth and Rettger, Leo F. Attempts to demonstrate a specific toxin in *Salmonella aertrycke*. (Var. meleagridis.) Abstract.... 86
Can the Endo medium be standardized? Abstract.... 33
Carpenter, C. M. and Boak, R. A. *Brucella melitensis* infection in cattle. Abstract.... 73
——, —— and Warren, S. L. Symptomatic herpetic manifestations following artificially induced fevers. Abstract.... 83
Castelda, Margaret, Gurley, Caroline R. and Goldberg, Ruth. Correlation of agglutinative types and endo-toxin. Abstract.... 94
Cell metabolism, The physiological youth of a bacterial culture as evidenced by.... 303
Certain host factors involved in the protective action of antipneumococcus serum in experimental infections in rabbits. Abstract.... 98
Chambers, Leslie A. and Flosdorf, Earl W. Comparative antigenic studies on egg albumin denatured by intense audible sound and by other means. Abstract.... 92
Change, A, in the contagious character of a strain of swine influenza. Abstract.... 82
Characteristics, The, of a probable new member of the neisseriese. Abstract.... 108
Charlton, David B. and Levine, Max. The survivor curves exhibited by bacterial spores in chlorine disinfection. Abstract.... 37
Cheese, Swiss, The bacteriology of. I. Growth and activity of bacteria during manufacturing processes in the Swiss cheese kettle.... 539

Chemistry, The, of the cellular constituents of the genus Brucella. Abstract. 108
Chemo-immunological, The, properties of the specific capsular polysaccharide of pneumococcus Type I. Abstract 89
Chlorine, The efficiency of, in sewage disinfection as affected by certain environmental factors 419
Clark, Ada R. and Gay, Frederick P. The differentiation of living from dead bacteria by staining reactions 175
Clark, Janet, Roos, Christopher and Reichel, John. Biological characters of the G and M variants of a hemolytic streptococcus. Abstract 99
Clark, W. Mansfield. Evolution toward a mature scientific literature 1
Clark, Wesley, Hoffstadt, Rachel E. and Youmans, Guy P. Antigenic structure of *Staphylococcus aureus* and its variants. Abstract 97
Clarke, Charlotte M. and Barnes, L. A. The pneumococcidal powers of sodium oleate and sodium ricinoleate. Abstract 107
Classification, The, of acid-fast bacteria. Abstract 41
Cloacal infection as a means of immunization against infections laryngotracheitis of fowls. Abstract 80
Clostridium lentoputrescens, Nov. Spec., A taxonomic study of "*Clostridium putrificum*" and its establishment as a definite entity 497
"—— *putrificum*" and its establishment as a definite entity—*Clostridium lentoputrescens*, Nov. Spec 497
Cl. tetani, A bacteriophage for 163
Coccoid, A, form of *C. diphtheriae* susceptible to bacteriophage. I 403
Coccus forms of *C. diphtheriae*. Abstract 45
Coffey, Julia M. A comparative study of freshly isolated and stock strains of *B. pertussis* in relation to their antigenic properties. Abstract 96
Cohen, Sophia M. Precipitation reactions of meningococcus strains with immune serum in agar plates in relation to antigenic activity. Abstract 85
Cohn, Maurice L. The antiseptic value of certain recently-advocated compounds 517
Collins, M. A. and Hammer, B. W. The action of certain bacteria on some simple tri-glycerides and natural fats, as shown by nile-blue sulphate 473
Collins, M. A. and Hammer, B. W. Types of lipolysis brought about by bacteria, as shown by nile-blue sulphate 487
Comparative, A, bacteriological study of a group of non-lactose-fermenting bacteria isolated from stools of healthy food-handlers 357
Comparative, A, study of certain presumptive test media. Abstract 57
—— antigenic studies on egg albumin denatured by intense audible sound and by other means. Abstract 92
Comparison, A, of the antigenic qualities of killed and living vaccine virus in the normal rabbit. Abstract 77
Composition, The, of standard media for use in routine milk control work. Abstract 71
Concerning the fixation of nitrogen by germinating seeds of leguminous plants. Abstract 55
Conklin, Marie Eckhardt. Mercurochrome as a bacteriological stain. Abstract 30

Conn, H. J., Chairman. Report of the Committee on Bacteriological Technic: Progress during 1933. Abstract 22
Conn, H. J. and Darrow, Mary A. An extremely economical sugar fermentation. Abstract 51
—— and ——. Can the Endo medium be standardized? Abstract 33
Constancy, The, of essential characters in *Lactobacillus acidophilus*. Abstract 41
Coöperative, A, study of freshly isolated and stock strains of *B. pertussis* in relation to their antigenic properties. Abstract 96
Corn-liver, A medium for the detection and dilution counts of various anaerobes. Abstract 35
Correlation of agglutinative types and endotoxin. Abstract 94
——, The, of animal and plant bacterial behavior and imposed culture medium environment. Abstract 47
C. diphtheriae, A coccoid form of, susceptible to bacteriophage. I 403
Cowles, Philip B. A bacteriophage for *Cl. tetani* 163
Craigie, James. A comparison of the antigenic qualities of killed and living vaccine virus in the normal rabbit. Abstract 77
Cruess, W. V. and Aref, H. An investigation of the thermal death point of *Saccharomyces ellipsoideus* 443
Cultivation of organisms concerned in the oxidation of thiosulfate in mineral media. Abstract 52
Culture media, The use of clarified honey in 349
Cummings, G. D. A strain of *Cl. tetanus* isolated from a human case of the disease. Abstract 99
Curran, Harold R. The influence of some environmental factors upon the thermal resistance of bacterial spores. Abstract 26

Darrow, Mary A. and Conn, H. J. An extremely economical sugar fermentation. Abstract 51
—— and ——. Can the Endo medium be standardized? Abstract 33
Decomposition, The, of alginic acid by microörganisms. Abstract 59
Differentiation, The, of hemolytic streptococci of human and animal origin by group precipitin tests 527
——, The, of living from dead bacteria by staining reactions 175
Disimmunization and accompanying phenomena. Abstract 92
Dissociation and filtration studies with *L. acidophilus*. Abstract 45
—— in yeasts. Abstract 43
—— in yeasts 583
—— of *Cl. welchii*. Abstract 46
—— of *Staphylococcus aureus* 551
——, Studies on, of certain paratyphoid bacilli. The rôle of variants in the precipitation of calcium sulphite 121
Distribution of the immunizing antigen in the pneumococcus. Abstract 90
Double-zone Beta hemolytic streptococci. Abstract 104
Duggar, B. M. and Hollaender, Alexander. Irradiation of plant viruses and of microörganisms with monochromatic light. I. The virus of typical tobacco mosaic and *Serratia marescens* as influenced by ultraviolet and visible light 219

Duggar, B. M. and Hollaender, Alexander. Irradiation of plant viruses and of microörganisms with monochromatic light. II. Resistance to ultraviolet radiation of a plant virus as contrasted with vegetative and spore stages of certain bacteria 241
Dutky, S. R. and Knaysi, Georges. The growth of *Bacillus megatherium* in relation to the oxygen-reduction potential and the oxygen content of the medium 109

Eaton, Monroe D. Studies on pneumococcus variation. I. Variants characterized by rapid lysis and absence of normal growth under the routine method of cultivation 271
Edwards, Philip R. The differentiation of hemolytic streptococci of human and animal origin by group precipitin tests 527
—— and Broh-Kahn, Robert. A note on the hydrolysis of sodium hippurate by the hemolytic streptococci 535
Effect, The, of certain tri-phenyl methane dyes on *Staphylococcus aureus* and *Bacterium coli communior*. Abstract 29
——, The, of the oxidation-reduction character of the medium on initiation of yeast growth. Abstract 29
——, The, of the temperature of incubation upon the agar plate count of milk. Abstract 70
Efficiency, The, of chlorine in sewage disinfection as affected by certain environmental factors 419
Eijkman or the Bulir tests, The failure of *Bacterium coli* from human feces to grow at 46° in the 191
Eldering, Grace and Kendrick, Pearl. A study of *B. pertussis* cultures by means of animal inoculation. Abstract 97
Endo, The, medium as a trapping agent and indicator for aldehyde. Abstract 33
Environmental factors, Lethal, within the natural range of growth 341
—— ——, The efficiency of chlorine in sewage disinfection as affected by certain 419
Etchells, John L., Kopeloff, Lenore M. and Kopeloff, Nicholas. Acidophilus milk at room and ice-box temperatures. Abstract 38
Etiology of encephalitis in St. Louis, 1933, and its differentiation by protection tests. Abstract 74
Etris, S. The antigenic relation of diphtheria organisms of the Gravis and Mitis strains. Abstract 96
Etris, S. and Bergey, D. H. The antigenic value of unprecipitated and of alum precipitated tetanus toxoid. Abstract 95
Evans, Alice C. Streptococcus bacteriophage and its usefulness for the identification of strains of hemolytic streptococci. Abstract 49
Evolution toward a mature scientific literature 1
Experimental mouse tuberculosis. Abstract 102
Extremely, An, economical sugar fermentation. Abstract 51
